

MULATEIRO POWDER

One Pound (16 oz)

Retail price: \$28.00

Description: Mulateiro is noted for its ability to completely shed and regenerate its bark on a yearly basis, making harvesting the bark a totally renewable and sustainable enterprise. The bark is smooth (as if polished) and changes colors throughout the year as it matures - going from a green tone to a brownish tone.

The bark has a long history of use among the Indians and local people in the Amazon.* For more complete information on this unique rainforest plant, please see the Raintree Nutrition internet website and the online [Tropical Plant Database](#).

Traditional Uses:* for fungal infections of the skin (athlete's foot, nail fungus, etc.); for skin parasites; for Candida and yeast infections; as a skin aid for wrinkles, scars, freckles, and age spots; for diabetes

Ingredients: 100% pure mulateiro bark (*Calycophyllum spruceanum*) No chemical additives or preservatives are used. This product is non-irradiated and non-fumigated. It is a wild harvested product—grown naturally in the Peruvian Amazon without any pesticides or fertilizers.

Suggested Use: This plant is best prepared as a decoction. Use one teaspoon of powder for each cup of water. Bring to a boil and gently boil in a covered pot for 20 minutes. Allow to cool and settle for 10 minutes and strain warm liquid into a cup (leaving the settled powder in the bottom of the pan). It is traditionally taken in 1/2 cup dosages 2-3 times daily. This decoction is also traditionally applied to the skin.

Contraindications: None known.

Drug Interactions: None known.

Clinical Documentation and Research:* This Raintree product has not been the subject of any clinical research. Available third-party documentation and clinical research on mulateiro be found at the [Raintree website](#). A partial listing of the research on mulateiro is shown below:
